

Get a Table from R

Get a Table from R

Description

This algorithm exports a CSV from a running R instance back onto the Data Manager.

Menu Path

R->Get table from R

Output

The imported table will appear as a child of the R instance in the Data Manager.

Usage Hints

Select the R instance in the Data Manager that contains the table you would like to import. Activate the algorithm from the menu. A prompt will appear asking which table to import, select the desired table. The imported table will appear as a child of the selected R instance.
