

Extract Top N% Records

Description

'Extract Top N% Records' lets you remove a certain % of the records in a table, keeping the records whose selected numeric attribute is in the top N % of records in table. For example, the table:

label	number_of_children
Amy	3
Bob	1
Carole	1
Dave	4

When thresholded at 50% on the column "number_of_children", will produce the table:

label	number_of_children
Amy	3
Dave	4
